

To: Key executives at IMARK member companies

Re: SourceWare by Informediate, Inc. is appointed as an IMARK Member Service Provider

In January 2015, IMARK formed a Technology Advisory Committee which consisted of IMARK member IT executives.

The committee carefully reviewed many ERP solutions in order to select a software company that could provide a cost effective ERP solution for electrical distributors.

Based on that review, SourceWare was selected for the following reasons:

- The SourceWare team has years of experience in electrical distribution ERP solutions.
- The complete system is compatible with the mobile environment.
- The system was developed from the ground-up using current technology platforms.
- SourceWare offers a robust web store as part of the package and has been proven in the electrical marketplace.
- Warehouse Management and Business Intelligence are also available.
- Maintenance and Support Service fees actually decrease over the first five years.

For more information visit their website at: www.informediate.com/sourceware_erp
